

STATEMENT OF SUBSTANCE OF INTERVIEW

Initially, Applicant wishes to thank Examiners Doan and Zia for conducting an in-person interview with Applicant's representative, Benjamin A. Keim, on July 22, 2008.

During the interview, Applicant's representative presented arguments distinguishing the claims from the Koved reference. In particular, Applicant's representative pointed out that Koved lacks any disclosure or suggestion that "the simulated stack walk comprises: entering a public entry point of a method in the assembly," as recited in dependent claims 46-50. Applicant's representative proposed amending independent claims 1, 12, 19, 26, and 38 to include features of dependent claims 46-50, which are lacking from the Koved reference.

Applicant's representative understood the Examiners to agree that the elements in dependent claims 46-50 are not found in the Koved reference. The Office indicates that an updated search is needed, and requests that the proposed amendments be presented in writing.

Accordingly, Applicant's representative herein amends independent claims 1, 12, 19, 26, and 38 to include features of dependent claims 46-50, as discussed during the interview. All claims are believed to be allowable for at least the reasons discussed during the interview.
